Esperia Life windows combine elegance and functionality. These are warm windows with narrow profiles, thanks to which up to 12% more natural light gets into the interior. They are suitable for both new buildings and renovation.

* The above U-factor is a general achievable value for this window system. The detailed value can be provided with the selected IGU and product type.

The colour palette presented on the Eko-Okna's website is for illustrative purposes only and cannot be a clear reference to the actual colours or wood grain. As the most reliable source of colours, we recommend the sample provided by our partner, Teknos.
